

## **Questions Addressed by Each Working Group**

1. What are the primary areas concerning the occurrence of acrylamide in food in which research is needed?
2. Are methods currently available to accomplish this research?
3. What is the time frame for getting results for the research identified?
4. What missing information is needed to enable the proposed research to be initiated or accomplished?
5. What questions will be answered by each research area proposed?
6. Rank the research areas/projects identified in order of priority for accomplishment.
7. Where is your Working Group linked to others, i.e., from what other Working Groups do you need assistance?
