EDUCATION

University of Pennsylvania	Philadelphia, PA
Ph.D., Energy Management and Environmental Policy	1997
M.S., International Development and Appropriate Technology	1991
Wheaton College	Norton Mass.
BA Anthropology	1985

Profile: Thirty years' experience answering policy questions using quantitative and qualitative socio-economic and risk assessment modeling techniques to address food safety and agricultural health hazards to improve health and nutrition both domestically and abroad. Researched numerous food safety and agriculture health topics aimed at helping low- and middle- and high-income countries to meet the U.N. Sustainable Development goals of 2030. Over 20 years' experience training professionals and researchers in risk analysis techniques to support regulatory decisions. Over 12 years of experience conducting monitoring and evaluation of the impact of capacity building efforts aimed at improving food safety, health, and nutrition. Committed to creating mechanisms for the public and private sector to share data to improve food safety, health, and nutritional outcomes. Five years' experience reviewing analysis supporting regulation.

WORK EXPERIENCE

Joint Institute for Food Safety and Applied Nutrition, University of Maryland College Park, MD
Director of the Food Safety Risk Analysis and Monitoring and Evaluation Programs. 1/2012-present

Role: I am responsible for promoting and expanding the food safety risk analysis training program. I build partnerships and secure funding from public and private sector stakeholders to financially support the participation of professionals from lower- and middle-income countries (LMIC) in training. I oversee the design, implementation, and management of a monitoring and evaluation (M&E) program that measures the impact of all JIFSAN food safety training and have provided guidance to national and international donors interested in measuring the impact of their own food safety programs. I lead several research projects focused on improving food safety aimed at improving health and nutritional outcomes in informal markets and data sharing activities. I serve on scientific groups and expert panels.

International Food Policy Research Institute

Washington, DC

Senior Research Fellow, Food and Water Safety Program Lead

8/2005-12/2011

Role: Developed the Food and Water Safety Research Program with goals aimed at 1) understanding the cost of compliance of increased food safety requirements and private standards on the poor, 2) evaluating the socio-economic implications of foodborne, plant, and animal disease, the cost-benefit and cost-effectiveness of various food safety and animal health risk reduction measures, and 3) understanding institutional mechanisms that have been successful in improving smallholder's market access. I was responsible for obtaining funds to support research programs and managed relationships with over 20 partner organizations and donors. I oversaw all the research work which included mentoring and managing senior and junior nationals in study countries. I engaged with Ministries of Health and Livestock to get project buy-in. I developed knowledge products including research reports and interim project briefs. I kept donors informed of project progress, presenting results to donors, country Ministries, International Organizations, and at academic forums.

United States Department of Agriculture (USDA)

Washington, DC

Economist in the Office of Risk Assessment and Cost-Benefit Analysis (ORACBA), 9/2000–7/2005
Office of the Chief Economist (OCE)

Role: Reviewed risk assessments and cost-benefit/effectiveness analyses of proposed and final agriculture rules for Departmental clearance. Provided guidance to USDA Agencies to meet regulatory compliance regarding animal diseases, plant diseases and food safety concerns. Consulted regularly with administrators within the Food Safety Inspection Service and the Animal and Plant Health Inspection Service regarding workplans. Evaluated regulatory analyses in support of rulemaking to ensure analyses had no errors. Conducted rapid economic analyses, prepared questions, and answers regarding USDA positions on various sanitary and phytosanitary issues and provided succinct briefings to the Chief Economist to aid the Secretary in decision-making and support testimony at Congressional hearings. On leave to FAO 2001-2003. Detailed to Office of Information and Regulatory Affairs, Office of Management and Budget, June-August 2005, where I reviewed regulatory analyses from across the government.

Food and Agricultural Organization, United Nations

Rome, Italy

Natural Resource Economist in the Animal Production and Health Division

4/2001–6/2003

Role: Led projects between International Agencies and National Institutes that focused on the impact of the livestock industrialization process on smallholders and how external factors such as environmental, animal health, and food safety impacted the profitability of these producers. Project manager on a DFID-EU funded four-country study that focused on the impact of the livestock industrialization process on smallholders. Managed projects and provided technical assistance with National Institutes who were establishing pilot studies to integrate intensive livestock production with crop production. Collaborated with National Institutes in low- and middle-income countries in designing household surveys, conducting economic and environmental impact analyses, and writing reports. Contributed to livestock and environmental projects focused on ways to integrate livestock and crop production activities to reduce negative environmental impacts associated with extensive livestock production.

American Association for the Advancement of Science Risk Fellowship

Washington DC

Risk Analysts in ORACBA, OCE.USDA

9/1999-8/2000

Role: Participated in reviews of risk assessments and cost-benefit/effectiveness analyses of proposed and final agriculture rules for Agency clearance. Consulted with USDA professionals on aspects of risk assessment and policy. Analyzed FSIS and APHIS data on interceptions of meat and plant products being imported to the U.S. to determine if any countries were having continual problems.

Risk Analyst for the Epidemiology and Risk Assessment Division

9/1998-8/1999

Office of Public Health, Food Safety Inspection Service, USDA

Role: Risk Analyst on the E. coli O157:H7 Farm to Table Risk Assessment. Managed the slaughterhouse segment of the model and provided technical documentation for public comment. Conducted cost-effectiveness analysis of various decontamination technologies in slaughterhouses. Wrote briefings for senior policy makers on the possible establishment of a single food safety agency.

FUNDRAISING

Approximately \$18 million U.S. of teaching and research funding as a PI or Co-PI from Feed the Future Innovation Laboratory for Fisheries, Inter-American Institute for Cooperation in Agriculture, Nestle

Foundation, World Bank, Grocery Manufacturers Association, USDA/FSIS, USDA/NIFA, USDA/FDA, USDA/AFRI, Mars Incorporated, Malaysia-Ministry of Health, Bill and Melinda Gates Foundation, DFID, CGIAR System-Wide Livestock Program, and CGIAR Science Council grant. Below are details of the grants while at University of Maryland and prior.

SERVICE ACTIVITIES

Reviewing Activities for Agencies and Foundations

- Lead panel reviewer USDA Agriculture Marketing Service (AMS) Specialty Crop Multi-State Program (SCMP) Grant Review (2019)
- Reviewer of USDA's Economic Research Service Food Safety Research Program - five year (2019)
- Reviewer for concept note for the UK call Zoonoses & Emerging Livestock System: Reducing the Risk to Livestock and people – 17 million pounds of funding (DFID, 4 Research Councils, and NERC) (2013, 2014)
- Reviewer of proposals to the World Bank (2011, 2012); Report People, Pathogens, and our Planet, volume 2 The Economics of One Health 2012
- Reports for Pew Charitable Trust
- Numerous discussion papers for International Food Policy Research Institute
- Reports for FAO: State of the World Towards a Responsible Livestock Future 2009; FAO's Guidelines for the Preparation of Livestock Sector Reviews 2011; Milk human nutrition dairy products 2013

International Committees, Memberships, Panels, Working groups etc.

- 2023-2027- Joint FAO/WHO Expert Committee on Microbiological Risk Assessment (JEMRA).
- 2022-2023- Asia-Pacific Economic Cooperation (APEC) Probiotics Products Testing Expert Committee on Next-generation sequencing-based Microbial Testing for Probiotics Products: Guidelines Development and Laboratory Capacity Building.
- 2022 Working group on “Enhancing aflatoxin management in Ghana's maize and groundnuts;” led by Rose Omari, Science and Technology Policy Research Institute - Council for Scientific and Industrial Research; notified received Standard Trade Development funding 2024 for full project.
- 2021-present - Food and Agriculture Organization, Scientific Advisory Committee of FAO's study on the Contribution of Livestock to Food Security, Sustainable Food Systems, Nutrition and Healthy Diets.
- 2021-2022 - Lloyd's Register Foundation, Steering Committee. for Safety of Food: Evidence Context Project.
- 2020-2023 - U.S, Academic representative to APEC Expert committee on Trade Facilitation through the Development of an APEC Food Safety Risk Communication Framework.
- 2020 -present- Academic rep. to APEC Food Safety Cooperation Forum Partnership Training Institute Network.
- 2019-2020 - Appointed to the National Academy of Science on the Institute of Medicine's consensus committee on “Strengthening Food Safety Regulatory Systems in Developing Countries.”
- 2017- 2021- Steering Committee for U.S. FDA's Produce International Partnership for Education and Outreach, and M&E working group lead.
- 2017-2020 - Working group looking at Spillover effects with Standard Trade & Development Facility, WTO.
- 2016-present - Steering committee of HESI COMPARE (The COMprehensive Protein Allergen REsource repository of protein sequences of known or putative allergens)
- 2016-present - Working group of the Food Safety Risk Analysis Training Consortium for the Americas led by FAO, PAHO, and University of Minnesota, received STDF funding in 2024.
- 2014-2015 - Working group on the Global Food Ethics Project at John Hopkins Berman Institute for Bioethics. Prepared paper Ethical Issues for Food Safety in Context of Global Food Security.”

- 2014-2015 - Expert Panel for a Global Regulatory Competency & Curricula Project with Regulatory Affairs Professionals Society.
- 2012-2015 - Academic Co-Chair Technical Working group on Monitoring and Evaluation of the World Bank Global Food Safety Partnership.
- 2012-2015 - Working group on the Risk Analysis Committee of the World Bank Global Food Safety Partnership.
- 2012-Member of Advisory Panel for Report People, Pathogens, and our Planet, Econ. of One Health.
